PEDIATRIC NEUROLOGY
Subject Index Volume 12

AIDS, childhood encephalopathy, and magnetic resonance spectroscopy, 277
Amnesia, transient global, as variant of acute confusional migraine, 129
Anemia, sickle cell, and nontraumatic fat embolism syndrome, 77
Anhidrosis with congenital insensitivity to pain, and muscle involvement, 264
Artery compression, vertebral, due to head rotation in thalamic stroke, 162
Arthrogryposis multiplex congenita due to congenital myasthenic syndrome, 237
Atrophy, spinal muscular, with oculomotor palsy, epilepsy, and cerebellar hypoperfusion, 323

Basal ganglia, infarction of, associated with California encephalitis virus, 346
Behr syndrome, 90
Blindness, and perichiasmal involvement on MRI, in tuberculous meningitis, 65
Blood flow, cerebral, and EEG changes in patent ductus arteriosus, 114
Bone marrow transplantation, neuromuscular complications, 58
Brain tumors associated with infantile spasms, 361

Cerebellitis, acute, and severe cerebellar atrophy, 159
Cerebral artery occlusion, reversible middle, and neonatal stroke, 191
Cerebral atrophy, severe, following acute cerebellitis, 159
Chiari I malformation, and Williams syndrome, 84
Cocaine exposure, intrauterine, and transient dystonia, 354
Congenital ichthyosis, in monozygotic twin patients with microcephalus, spastic quadriplegia, myoclonus, and EEG abnormalities, 255
CTG repeat, minimal somatic instability of, in congenital myotonic dystrophy, 81

ECMO
  And median nerve somatosensory evoked potentials, 42
  Neonatal, with MRI and angiography following, 294
EEG
  Abnormalities, in monozygotic twin patients with congenital ichthyosis, microcephalus, spastic quadriplegia, and myoclonus, 255
  And cerebral flow changes in patent ductus arteriosus, 114
EEG-sleep measures, maturational trends in healthy preterm neonate, 314
Ehlers-Danlos syndrome, and peripheral neuropathy, 242
Encephalitis
  Brainstem, and acute transverse myelitis associated with hepatitis A infection, 169
  California, and infarction of basal ganglia, 346
  Herpes simplex, and operculum syndrome, 246
Encephalomyopathy, developmental, neuroimaging and spectroscopy evidence for, and glutaric acidemia type II, 350
Encephalopathy, childhood AIDS, and magnetic resonance spectroscopy, 277
Epilepsy
  And changes in P300 latency with age, 132
  And quality of life, 267
  Intractable, and thyrotropin-releasing hormone in treatment of, 139
  Intractable temporal lobe, and febrile seizures and hippocampal sclerosis, 201
  With spinal muscular atrophy, oculomotor palsy, and cerebellar hypoperfusion, 365
Epileptiform discharges, periodic lateralized, clinical correlation, 225
Eye problems in multiple sclerosis, 207

Fabry disease, successful treatment of painful crises with low dose morphine, 250
Fat embolism syndrome, nontraumatic, in sickle cell anemia, 77
Fatty acid oxidation, abnormalities in childhood-onset spinal muscular atrophy, primary or secondary defect(s)?, 21
FLAIR sequences, and optic neuritis with silent cerebral lesions, 152
Fontan operation, cerebrovascular accidents following, 230

Gliomas, optic, in neurofibromatosis type I, role of VEPs, 89
Glutaric acidemia type II, neuroimaging and spectroscopy evidence for developmental encephalomyopathy, 350

Heart block, complete, in nonfamilial hyperekplexia, 149
Hemolytic uremic syndrome with involvement of basal ganglia and favorable outcome, 155
Hepatitis A infection, and acute transverse myelitis and brainstem encephalitis, 169

Hyperekplexia, nonfamilial, and complete heart block, 149
Hypoperfusion, cerebellar, with spinal muscular atrophy, oculomotor palsy, and epilepsy, 365

Ichthyosis, congenital, in monozygotic twin patients with microcephalus, spastic quadriplegia, myoclonus, and EEG abnormalities, 255
Immunohistochemistry for a bifunctional protein in patients with peroxisomal disorders, 341
Infantile spasms, brain tumors associated with, 361

L-3-hydroxyacyl-CoA dehydrogenase deficiency to oral prednisone, clinical and neurophysiologic response to myopathy and neuropathy, 68
Lumbosacral plexus neuropathy, posttraumatic childhood, 62

Magnetic resonance angiography, in 140 neuropediatric patients, 31
Melanoma, primary malignant, of meninges: atypical presentation of subacute meningitis, 172
Meningitis
  Bacterial, sequelae of, and impairment of respiratory rhythmogenesis, 357
  Subacute, and primary malignant melanoma of meninges, 172
  Tuberculous, with blindness and perichiasmal involvement on MRI, 65
Mesial temporal sclerosis, pathogenesis and significance, 5
Microcephalus, in monozygotic twin patients with congenital ichthyosis, spastic quadriplegia, myoclonus, and EEG abnormalities, 255
Migraine, acute confusional: variant of transient global amnesia, 129
Monozygotic twin patients with congenital ichthyosis, microcephalus, spastic quadriplegia, myoclonus, and EEG abnormalities, 255
Morphine, low dose, as successful treatment of painful crises of Fabry disease, 250
MRI
  And angiography following neonatal ECMO therapy, 294
  In neurofibromatosis type I, using fluid-attenuated inversion recovery pulse sequences, 286
Multiple sclerosis, and eye problems, 207
Muscular atrophy, childhood-onset spinal, and fatty acid oxidation abnormalities, 21
Myasthenic syndrome, congenital, and arthrogryposis multiplex congenita, 237
Myelitis, acute transverse, and brainstem encephalitis associated with hepatitis A infection, 169
Myoclonus, in monozygotic twin patients with congenital ichthyosis, microcephalus, spastic quadriplegia, and EEG abnormalities, 255
Myopathy
  And neuropathy, clinical and neurophysiologic response to oral prednisone in long-chain L-3-hydroxyacyl-CoA dehydrogenase deficiency, 68
  Centronuclear, variant of, in congenital myopathy with ringlike distribution of myonuclei and mitochondria and accumulation of nemaline rods, 370
  Congenital, with ringlike distribution of myonuclei and mitochondria and accumulation of nemaline rods, a variant of centronuclear myopathy?, 370
Myotonic dystrophy, congenital
  And minimal somatic instability of CTG repeat, 81
  And proton magnetic resonance spectroscopy of the brain, 335

Neonatal stroke, and reversible middle cerebral artery occlusion, 191
Neuritis, optic, with silent cerebral lesion: availability of FLAIR sequences, 152
Neurofibromatosis type I
  And MRI, using fluid-attenuated inversion recovery pulse sequences, 286
  Optic gliomas in, and role of VEPs, 89
Neuroimaging, functional, 267
Neuropathy
  And myopathy, clinical and neurophysiologic response to oral prednisone in long-chain L-3-hydroxyacyl-CoA dehydrogenase deficiency, 68
  Peripheral, in Ehlers-Danlos syndrome, 242
Neurosurgery, pediatric, 267

Oculomotor palsy, with spinal muscular atrophy, epilepsy, and cerebellar hypoperfusion, 365
Operculum syndrome, unusual feature of herpes simplex encephalitis, 246
Optic gliomas, in neurofibromatosis type I, role of VEPs, 89
Optic neuritis, with silent cerebral lesions, and FLAIR sequences, 152

P300 latencies, changes with age in epilepsy, 132
Pain insensitivity, congenital, with anhidrosis, and muscle involvement, 264
Patent ductus arteriosus, with cerebral blood flow and EEG changes, 114
Pelizaeus-Merzbacher disease, neurophysiologic studies and MRI, 47
Perichiasmal involvement on MRI, with blindness, and tuberculous meningitis, 65
Peroxisomal disorders, and immunohistochemistry for a bifunctional protein, 341
Plantar grasp response, asymmetry during infancy, 54
Prednisone, oral, clinical and neurophysiologic response of myopathy and neuropathy in long-chain L-3-hydroxyacyl-CoA dehydrogenase deficiency, 68
Purine nucleoside phosphorylase deficiency, and stroke, 146

Quadriplegia, spastic, in monozygotic twin patients with congenital ichthyosis, microcephalus, myoclonus, and EEG abnormalities, 255

Respiratory rhythmogenesis, impairment of, and sequelae of bacterial meningitis, 357

Seizures
  Associated with stroke, 136
  Febrile, and hippocampal sclerosis, frequent and related findings in intractable temporal lobe epilepsy, 201
  Psychogenic, video telemetry observations, 39
Sickle cell anemia, and nontraumatic fat embolism syndrome, 77
Somatosensory evoked potentials, median nerve, in children receiving ECMO, 42
Spectroscopy
  Magnetic resonance, in childhood AIDS encephalopathy, 277
  Proton magnetic resonance
    In acute central nervous system injury, 323
    Of brain in congenital myotonic dystrophy, 335

Spinal muscular atrophy, with oculomotor palsy, epilepsy, and cerebellar hypoperfusion, 323
Status epilepticus, and effect of prehospital treatment on outcome, 213
Striatal-thalamic degeneration, infantile progressive, a new syndrome, 260
Stroke
And seizures, 136
In purine nucleoside phosphorylase deficiency, 146
Neonatal, 191
Thalamic, and vertical artery compression due to head rotation in, 162

Thyrotropin-releasing hormone in treatment of intractable epilepsy, 139
Transverse myelitis, acute, and brainstem encephalitis, associated with hepatitis A infection, 169
Tuberculous meningitis, with blindness and perichiasmal involvement on MRI, 65

Varicella, and pre-eruptive neurologic manifestations associated with multiple cerebral infarcts, 165
Vertebral artery compression, due to head rotation in thalamic stroke, 162
Video-EEG, pediatric outpatient, diagnostic value of, 120
Video-EEG monitoring, clinical utility of, 220
Visual system electrodiagnosis in neurologic disease, 99

Watson syndrome, evidence of central nervous system involvement, 252
Williams syndrome, and Chiari I malformation, 84
